Dear Don,

**Re: B.C Fallers using modified chainsaws.**

It has come to our attention that there seems to a real push going on in the province to shut down the use of modified saws by Fallers in our woodlands. It is the feelings of this organization that this action will prove to be a grave mistake.

The WFA is requesting an expeditious review of WSBC policy towards these tools. The cold hard fact and truth about Fallers using modified saws is that when it comes to our health, safety and general well being, the good things these saws are doing for us vastly outweighs any bad that the 'Board' may think is going on.

As always, WFA Board and I are more than willing to assist WSBC with any further dialogue or consultation on this matter.

Respectfully yours,

Michael McKibbin, Chairman  
Western Fallers Association
